Summary

Full-stack web developer with four years building and operating production systems end to end — a CRM, a staff management platform, an e-commerce storefront, and a modular CMS — in Laravel and Vue/Nuxt. I ship the application and run the infrastructure underneath it, and I use AI-assisted tooling to do both faster.

Experience

Full-Stack Web Developer

Jul 2022 – Jun 2026

PageOne247

- **CRM platform.** Client management system with interactive record handling, in daily production use. Laravel, Blade, jQuery, MySQL.
- **Custom CMS.** Fully modular CMS with dynamic page building, reusable blocks and sections, a role-based admin panel, and real-time editing. Laravel, Vue/Nuxt, Tailwind CSS.
- **Staff management platform.** Laravel backend with a Vue.js frontend, extended by additional modules written in Django and React.
- **E-commerce storefront.** Responsive online store on a Nuxt.js storefront backed by a Laravel API.
- **Shopify theme customization.** Short-term engagement adding booking calendars and product filters in Liquid, HTML, CSS, and JavaScript.
- **Infrastructure and operations.** Ran the hosting, DNS, and TLS behind these applications: DigitalOcean droplet provisioning, SSL certificates and WordPress hosting; Cloudflare DNS and tunnel configuration; HostGator deployments and email forwarding; GoDaddy domains.

Working method. AI-assisted development with Claude, Cursor, and Codex, plus n8n automation workflows — used to move faster without handing over architecture or review.

Education

B.Sc. Information Technologies

Aug 2021 – Oct 2025

Interface Computer College

Technical Skills

Back-end	Laravel, PHP, Django, Python	Front-end	Vue, Nuxt, React, JavaScript
Infrastructure	DigitalOcean, Cloudflare, HostGator, GoDaddy	Ops	Docker, NGINX, Linux, SSL/TLS, DNS
E-commerce	Shopify, Liquid	Data	MySQL
Styling	Tailwind CSS	AI tooling	Claude, Cursor, Codex, Gemini, n8n
