Summary

Full-stack web developer with three years at PageOne247, delivering multi-tenant commerce, CMS, staff-management, and CRM systems with Laravel and Vue/Nuxt. I work across product UI, backend APIs, data, deployment, DNS, and TLS, using AI-assisted tooling to accelerate delivery while keeping architecture and review human-owned.

Experience

Full-Stack Web Developer

Jul 2023 – Jun 2026

PageOne247

- End-to-end systems — sole developer.** Designed, built, and shipped a Nuxt/Laravel commerce storefront, a modular CMS with page building and role-based administration, and a Laravel/Vue staff platform later extended with Django and React modules.
- Production CRM delivery.** Added features and modules to an established client-management application across Laravel, Blade, jQuery, PHP, and MySQL while preserving existing production behaviour.
- Client commerce and content platforms.** Delivered configurable storefront, services, administration, appointment, gallery, checkout, payment, and editorial workflows for food, art, healthcare, and service clients.
- Infrastructure and operations.** Managed Docker/NGINX deployments, DigitalOcean droplets, SSL/TLS, Cloudflare DNS and tunnels, HostGator deployments and email forwarding, WordPress hosting, and domains.
- Shopify customization.** Implemented booking-calendar behaviour, product filtering, and responsive storefront refinements with Liquid, HTML, CSS, and JavaScript.

Working method. AI-assisted development with Claude, Cursor, and Codex, plus n8n automation workflows — used to move faster without handing over architecture or review.

Selected Systems & Client Projects

Named project work reflected in the portfolio; private environments are labelled.

Multi-tenant commerce platform · Private build

DATABASY / SSU

Built tenant-resolved storefronts and administration for catalogue, orders, themes, subscriptions, payments, domains, staff access, 2FA, and role boundaries.

Nuxt 4 · Laravel · MySQL · Reverb · Docker · NGINX

Production client-management system

DataBasy CRM

Delivered full-stack features and production maintenance inside a mature authenticated codebase without replacing its established behaviour.

Laravel · Blade · jQuery · PHP · MySQL

Food commerce + operations

Azura Fresh

Multi-tenant catalogue, cart, checkout, payments, order tracking, delivery locations, and configurable public content.

Optometry services + appointments

Elite Optometry United

Optometry services, practice locations, suburb landing pages, and embedded appointment booking.

Additional builds: service-request dispatching with assignment and job tracking; event ticketing with inventory, checkout, and operational management.

Gallery + art commerce

Sharon Comello Art

Original artwork, collections, commissions, journals, gift cards, enquiries, and secure purchasing with Stripe and Square.

Configurable services website · Private staging

Tan

A services-focused website and administration experience for presenting services and managing public content.

Education

B.Sc. Information Technologies

Aug 2021 – Oct 2025

Interface Computer College
