Summary

Full-stack web developer with four years at PageOne247. Sole developer on three end-to-end systems in Laravel and Vue/Nuxt — a modular CMS, a staff management platform, and an e-commerce storefront that shipped to production. I ship the application and run the hosting, DNS, and TLS underneath it, and I use AI-assisted tooling to do both faster.

Experience

Full-Stack Web Developer Jul 2022 – Jun 2026
PageOne247

- E-commerce storefront — sole developer.** Designed and built a responsive online store end to end and shipped it to production: Nuxt.js storefront on a Laravel API.
- Custom CMS — sole developer.** Built a fully modular CMS from scratch: dynamic page building, reusable blocks and sections, a role-based admin panel, and real-time editing. Laravel, Vue/Nuxt, Tailwind CSS.
- Staff management platform — sole developer.** Built a staff management system on a Laravel backend with a Vue.js frontend, extending it with modules written in Django and React.
- CRM platform — feature development.** Added features and modules to an established CRM in production use, working across Laravel, Blade, jQuery, and MySQL.
- Shopify theme customization.** Short-term engagement on a live storefront, adding booking calendars and product filters in Liquid, HTML, CSS, and JavaScript.
- Infrastructure and operations.** Ran the hosting, DNS, and TLS behind these applications: DigitalOcean droplet provisioning, SSL certificates and WordPress hosting; Cloudflare DNS and tunnel configuration; HostGator deployments and email forwarding; GoDaddy domains.

Working method. AI-assisted development with Claude, Cursor, and Codex, plus n8n automation workflows — used to move faster without handing over architecture or review.

Selected Personal Projects

Built with AI-assisted tooling and deployed to private environments.

- Multi-tenant e-commerce platform.** Custom theme presets, dynamic payment integrations, and per-tenant store and domain management. Nuxt, Laravel, Docker, Bun, NGINX.
- Dispatching system.** Dispatches workers to service requests, coordinating assignments and tracking jobs end to end. Next.js, Laravel, Docker, NGINX.
- Ticketing system.** Event creation and ticket sales, covering event setup, inventory, and checkout. Vue, Laravel, Docker, NGINX.

Education

B.Sc. Information Technologies Aug 2021 – Oct 2025
Interface Computer College

Technical Skills

Back-end	Laravel, PHP, Django, Python	Front-end	Vue, Nuxt, React, JavaScript
Infrastructure	DigitalOcean, Cloudflare, HostGator, GoDaddy	Ops	Docker, NGINX, Linux, SSL/TLS, DNS
E-commerce	Shopify, Liquid	Data	MySQL
Styling	Tailwind CSS	AI tooling	Claude, Cursor, Codex, Gemini, n8n
