Summary

Web Developer with 3 years of experience building and maintaining full-stack web applications using Laravel and Vue.js/Nuxt.js. I also have hands-on experience working with Django, React.js, and Shopify in e-commerce development. Passionate about modern web technologies and continuously exploring how AI can improve development workflows and enhance product innovation.

Professional Experience

Web Developer, *PageOne247*

07/2022 – 2026

- CRM Web App: Built a CRM system using Laravel with Blade and jQuery for client management and interactive features.
- Staff Management Web App: Developed a staff management solution using Laravel (backend) and Vue.js (frontend), with additional modules in Django and React.js.
- E-commerce Web App: Created an online store using Nuxt.js and Laravel for a responsive and dynamic shopping experience.
- Shopify Theme Customization: Customized Shopify themes over a short-term project, adding features like calendars and filters using Liquid, HTML, CSS, and JavaScript.
- Custom CMS Platform: Developed a fully modular CMS with dynamic page building, reusable blocks/sections, a role-based admin panel, and real-time editing features using Laravel, Vue.js/Nuxt, and Tailwind CSS.

Education

Bachelor Science Information Technologies, *Interface Computer College*

08/2021 – 10/2025
